

MOHIT RATHORE

PRODUCT DESIGNER / UI & UX

Bhopal, Madhya Pradesh, India | +91 62643 98181 | ankitrathor2mni@gmail.com | linkedin.com/in/mohit-rathore-67468a270

PROFILE

Product designer focused on UI/UX for SaaS products and high-converting marketing pages. I design and ship the landing pages for every product in the Pabbly suite, and owned the end-to-end UI/UX for Pabbly Email Marketing — from user flows and wireframes through high-fidelity Figma prototypes to the shipped interface, including its internal product roadmap. Comfortable working in the browser as well as in Figma, so what I design is what actually goes live.

EXPERIENCE

Magnet Brains Software Pvt. Ltd.

Jul 2025 – Present

Product Designer (UI/UX) — Bhopal, India

- Design and ship the landing pages for the entire Pabbly product suite — Connect, Chatflow, Hook, Email Marketing and more — keeping one consistent visual language across every product.
- Owned end-to-end UI/UX for Pabbly Email Marketing: user flows, wireframes, high-fidelity Figma prototypes and design QA through to release.
- Built the internal product roadmap for Pabbly Email Marketing, mapping features, priorities and release phases together with the product and engineering team.
- Maintain a shared component and section library for the landing pages, so new pages are assembled from proven patterns instead of being designed from scratch.
- Build my own designs in HTML, CSS, Tailwind and React, keeping handoff lossless and design intent intact in production.
- Run design reviews with product, marketing and development, and iterate on pages based on how they actually perform.

SELECTED WORK

- **Pabbly Email Marketing** — Email campaign platform. Handled UI/UX end to end: campaign creation flow, template and subscriber management, and reporting views — plus the internal roadmap that shaped the release plan.
- **Pabbly Landing Pages** — Designed and built the marketing pages for all Pabbly products: hero sections, pricing tables, feature blocks and responsive layouts, designed for clarity and signup conversion.
- **Pabbly Design Language** — A shared set of typography, colour and section patterns used across every Pabbly page, which cut page build time and removed visual inconsistencies between products.

SKILLS

DESIGN

Figma (advanced), Canva, prototyping & interaction design, wireframing, design systems & component libraries, user research, usability testing, information architecture, responsive & accessible design, landing page & conversion design, design handoff

DEVELOPMENT

React JS, HTML / CSS / JavaScript, Tailwind CSS, Astro, MUI, Bootstrap, WordPress, Elementor, Git

PRODUCT & PROCESS

Product roadmapping, feature prioritisation, design QA, cross-functional collaboration, design critique, stakeholder communication

EDUCATION

2021 – 2025

B.Tech, Computer Science

Sagar Institute of Science Technology & Engineering (RGPV), Bhopal
